Here is the review of a week that has just passed 😊

We **started the week** with a bench full of **unutilized** people and we **ended** it in a way that we had to forcefully take several people off of one project to cover another two projects 😊

And thats great! Let the CPU work on **120%** if possible

NO.1 BEST-SELLING MANAGEMENT BOOK IN SWEDEN

THIS IS LEAN

RESOLVING THE
EFFICIENCY PARADOX

NIKLAS MODIG & PÄR ÅHLSTRÖM

"Lean is an apparently easy term to remember, but a rather difficult concept to understand accurately. *This Is Lean* is one of the most concise, easy-to-grasp, and fun-to-read books on the topic and it will help you understand the essence of this important management philosophy."

PROFESSOR TAKAHIRO FUJITA
THE WORLD'S LEADING AUTHORITY ON TOYOTA PRODUCTION SYSTEM

WWW.THISISLEAN.COM

"When organisations focus too much on utilising resources efficiently, it tends to lead to an increase in the amount of work there is to do."

"The more organisations try to be efficient (being busy), the more inefficient they will actually become (taking care of non-value adding but necessary work)."

Mercenaries build whatever they're told to build.

Missionaries are true believers in the vision and are committed to solving problems for their customers.

#1 Create a win-win for your company and the consulting company

#2 Ensure the consulting company truly understands your business and problem

#3 Be committed, ensure you have the internal people ready to partner with the consultant

--Courtney Kissler

Manifesto for service organizations

We are uncovering better ways of developing software by
doing it and helping others do it.

Through this work we have come to value:

Strategic work over just “more” work

Flow over headcount

Missionaries over mercenaries

Community over zero-sum approach

That is, while there is value in the items on the right,
we value the items on the left more.

A photograph of a paved path in a forest, covered with fallen brown leaves. The path leads into the distance, where a red car is visible. The trees are tall and thin, with green foliage at the top. The overall scene is slightly blurred, giving a sense of depth and focus on the path.

Where do we go from here?

Metrics and data analysis

The background of the slide features a silhouette of two people climbing a mountain peak. One person is standing on the ridge, reaching down to assist the other who is pulling themselves up. The scene is set against a bright, hazy sunset sky with a low sun creating a lens flare effect. The overall tone is inspirational and collaborative.

Here's the help I'm looking for...
