Chicago, IL

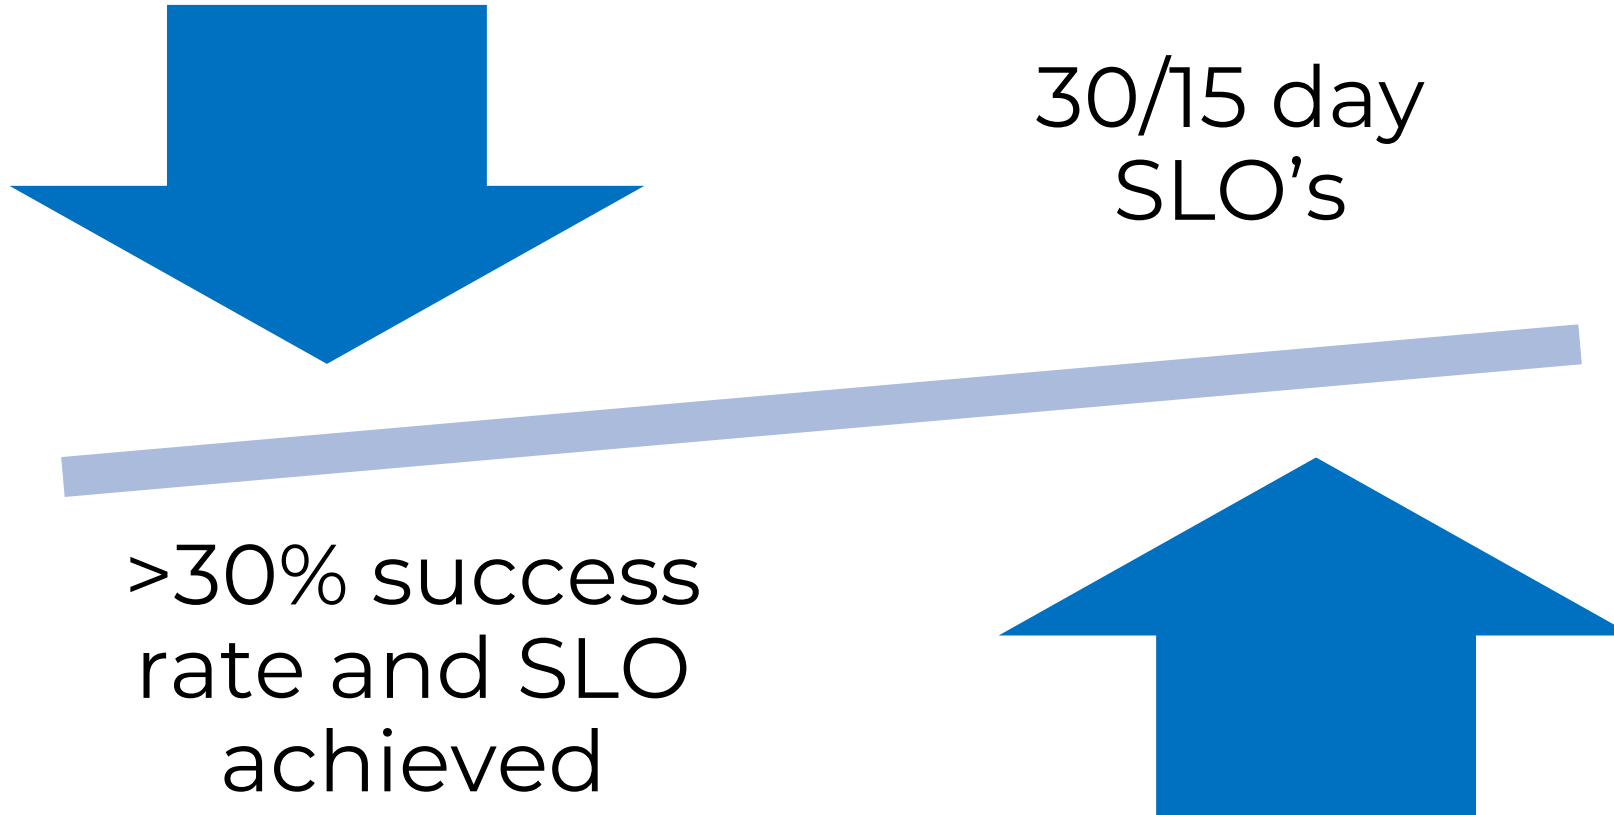

Madrid, SP

Duck Creek OnDemand

Starting Point

Approach

- ▶ Centerpiece: Value stream mapping workshop with cross-functional team
- ▶ Ahead of time: Gemba walk, context building, trust building
- ▶ After: action plan / continuous improvement approach

Mechanics – getting buy in

Challenges: Remote Gemba Walk & VSM

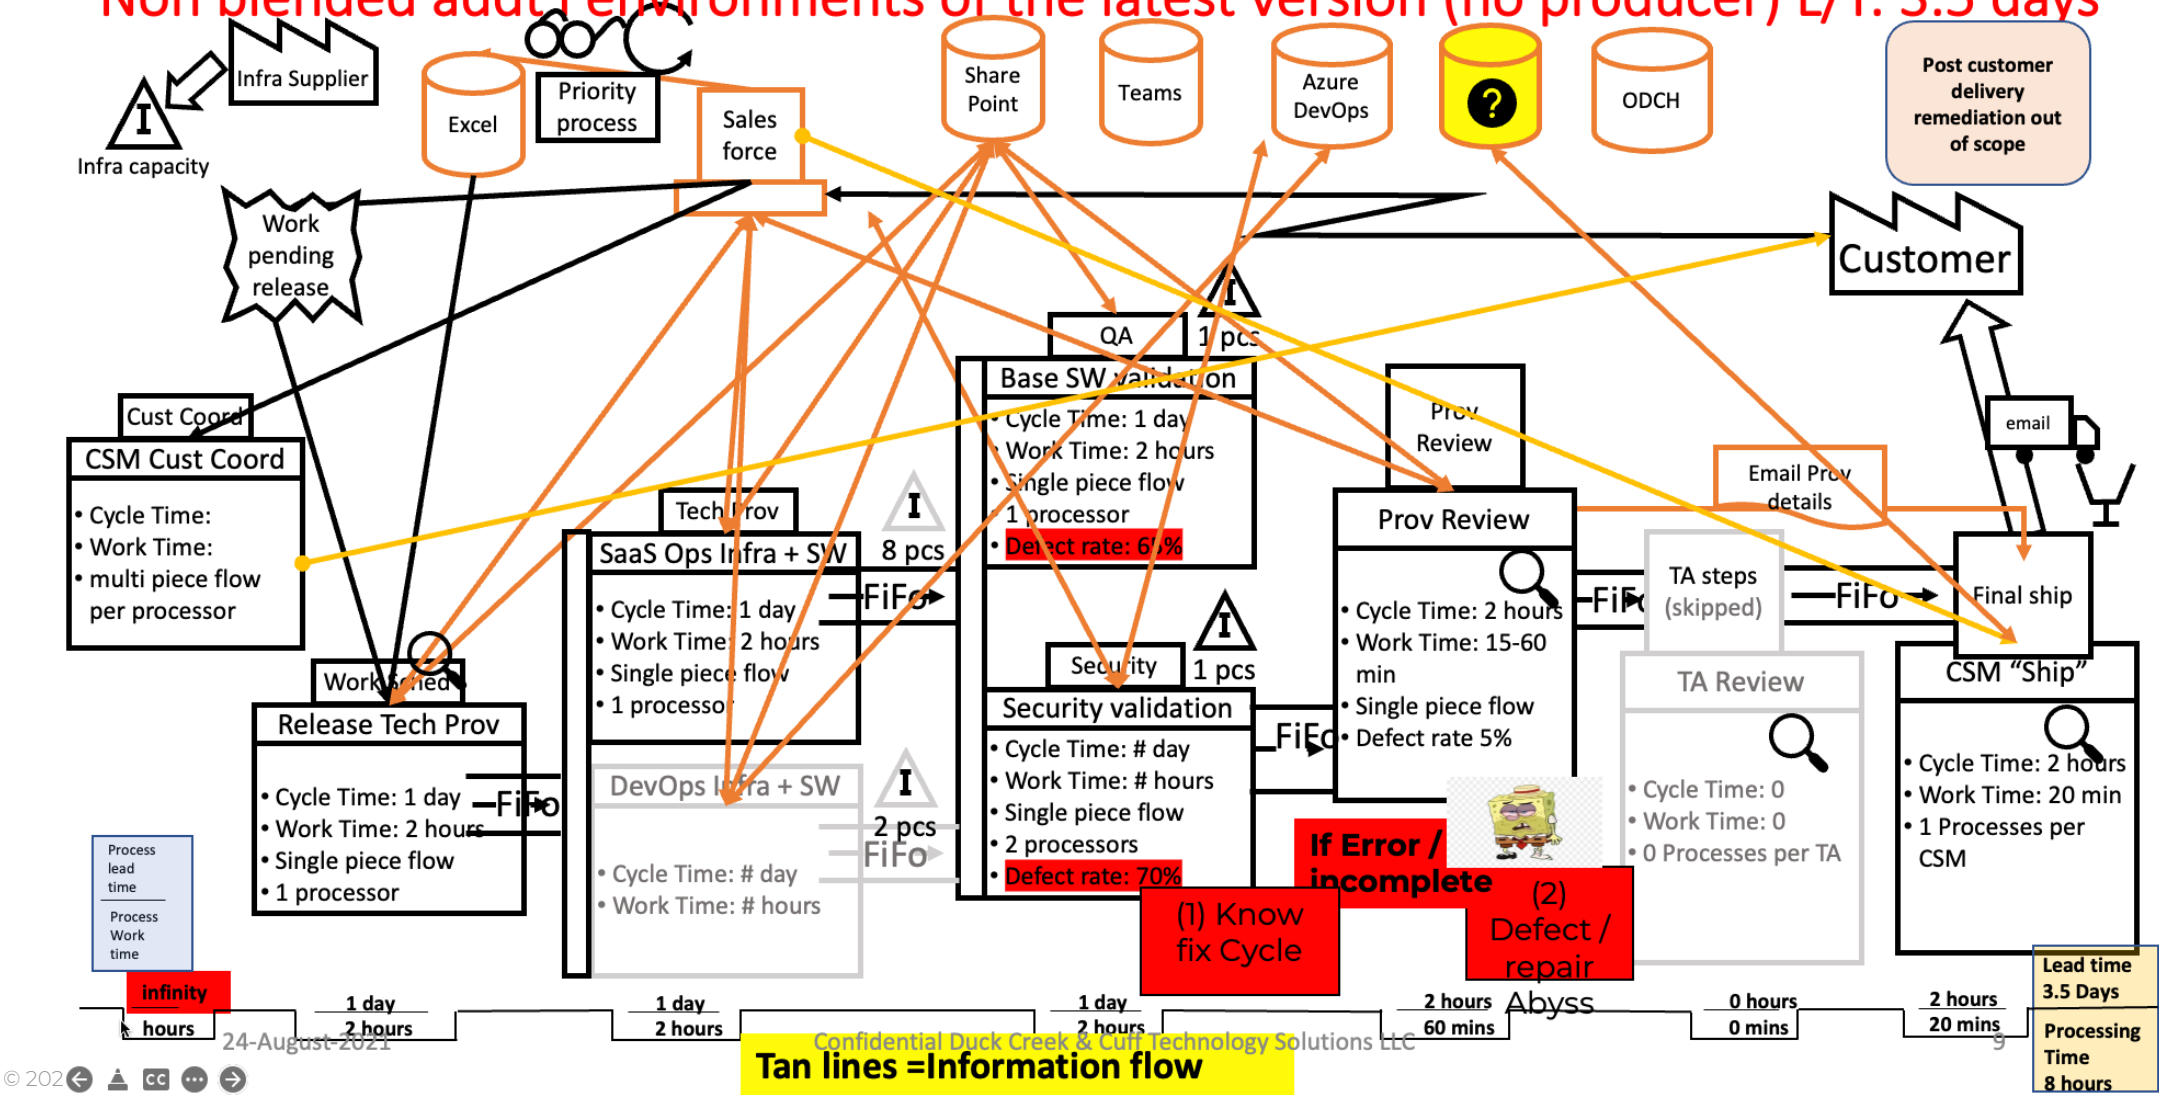

► How it started

This is what shared understanding looks like (really)

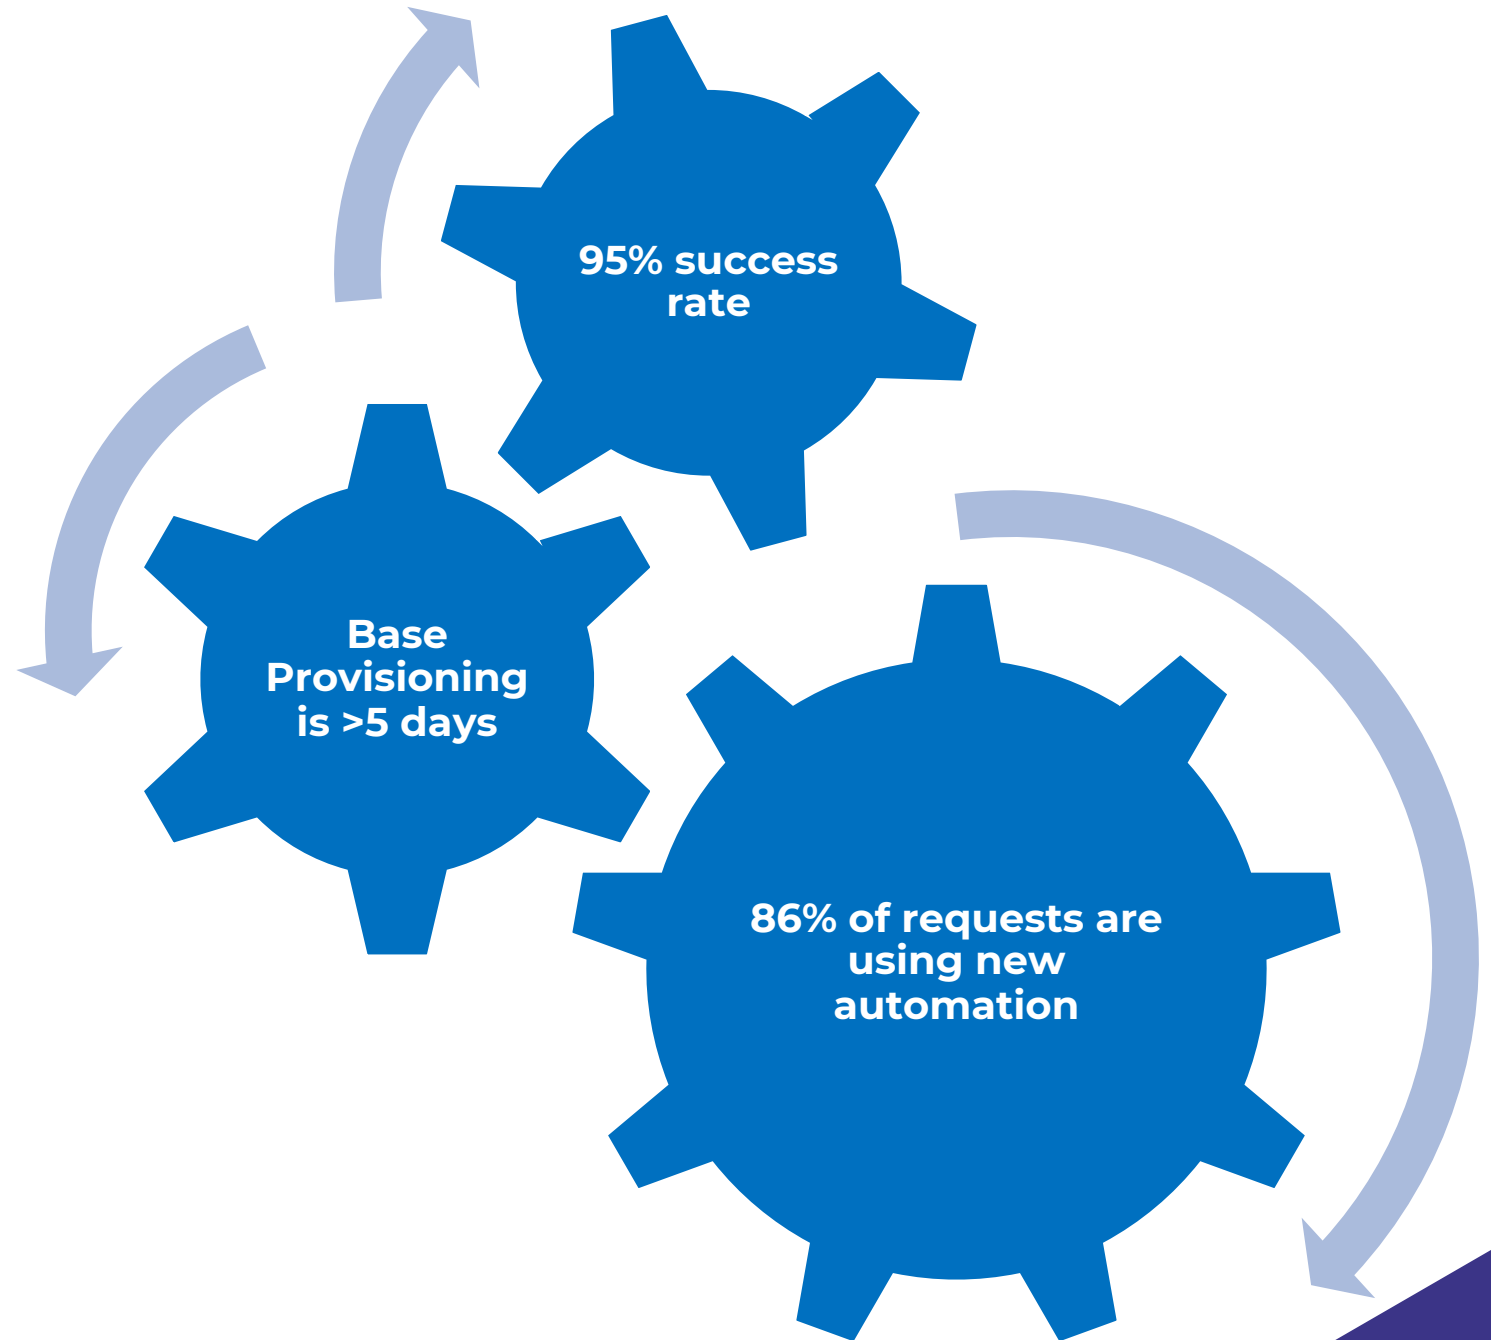

Non blended addt'l environments of the latest version (no producer) L/T: 3.5 days

What we found - Themes

Outcomes

What need from the community

- ▶ Look for accomplices – if Tricia and Josh are working on something, it's likely to succeed.
- ▶ Look at really engaging beyond tech and meeting groups where they are
 - Tactics matter → things like PowerPoint rather than Lucid chart, Visio, Miro
 - Encourage the instincts that drive people to optimize their part of the system

Thanks

Tricia Burke
